Full Stack Developer / Cloud Systems
November 2011 - Present (10 years 11 months)
Oklahoma

Joe Winett dba SYIhosting.com
Linux Admin / Web Hosting
December 2010 - Present (11 years 10 months)
Oklahoma

Web hosting service

MightyPages.com
Senior Developer
November 2011 - April 2017 (5 years 6 months)
Yukon, Oklahoma

Independent contractor for Steve Cornaby's startup.   PHP,   jQuery, AJAX,
MongoDB, Perl, ElasticSearch, Atlassian products (JIRA, Confluence,
Bitbucket, Bamboo, Hipchat)

PSG IT Consulting
IT Support Specialist

September 2009 - August 2010 (1 year)
Shawnee, Oklahoma, United States

Dennis Dyer employed this homeless man and helped him find a more permanent place to stay. God bless you, Dennis.

McKesson
Contract Programmer
September 2007 - January 2008 (5 months)
Tulsa, Oklahoma, United States

McKesson RelayHealth was once CIS Technologies, Inc. -- operator of a healthcare insurance claim processor and clearinghouse. Now they provide many software services for various McKesson vertical markets.

Advance Financial Group
Senior Software Development Engineer
May 2006 - August 2007 (1 year 4 months)
Bixby, Oklahoma, United States

Designed and coded new functionality in VB/SQL client-server application. Also designed new functionality for customer web site using ASP, VBScript, and Javascript.

Ferguson Group Publishing and Ferguson Rating Systems
Web Application Developer
October 2004 - April 2006 (1 year 7 months)
Tulsa, Oklahoma, United States

Build website with custom CMS functionality and online subscription service in VB/ASP/MS-SQL.

Designed and coded interactive, service-oriented web site in VB/ASP/MS-SQL. Site implements a complex financial rating system intended for use by lenders in the farm and ranch industry to evaluate their customers' business histories and forecast future performance in order to examine ability to repay loans.

Vigoris Technologies Inc
President
May 1996 - May 2004 (8 years 1 month)
Broken Arrow, Oklahoma, United States

Internet service provider. Created all software required to run the business including Win32 services in C++, and web interfaces in ASP, VBScript, and JavaScript. Network programming included TCP and UDP over IP, SNMP. All back office data was on MS-SQL Server.

Floral Haven Funeral Home and Cemetery
Information Technology Manager
May 1993 - May 2004 (11 years 1 month)
Broken Arrow, Oklahoma, United States

Created and maintained software for Altos System V UNIX to automate billing, sales commission calculation, etc. Also wrote a voicemail system for the Northern Telecom KSU.   Note: Employed by Grandparents, Mother and Aunt whom also invested in Vigoris Technologies, Inc.

Healthcare Administration Technologies, Inc.
Senior Computer Programmer
October 1992 - April 1993 (7 months)
Tulsa, Oklahoma, United States

The first employee.   Designed and created a health care claims editing engine in Visual Foxpro for founder, John W. Carter. Didn't stay long enough to vest founding stock -- makes me perfect for your startup!!

CIS Technologies, Inc.
Programming Analyst
June 1990 - April 1992 (1 year 11 months)
Tulsa, Oklahoma, United States

Left OSU for what seemed like a million dollars, $28,500/yr. I hated school, anyway. So, I neither have a Computer Science degree from OSU nor a Business Management degree from Tulsa Junior College (now TCC), but I did spend 4 years paying for school.

C programming using Microsoft's C compiler in MS-DOS. We were the first department allowed to have a LAN. It was a coaxial ethernet loop. It crashed a lot.   Mentor, John W. Carter, allowed me to spend two weeks trying to perfect dynamic runtime linking like would later be called a Dynamic Link Library .DLL on Windows. I worked from the Common Object Model .obj linking handbook specification by Microsoft. I could get it to work but not make it practical for replacing object code inside machines at hospitals.

KMYZ Pryor (now 104.5 The Edge Tulsa)
Programming Assistant
September 1986 - August 1988 (2 years)
Tulsa, Oklahoma, United States

I started as the Sunday morning tape watcher for public affairs programming followed up by several hours of FLASHBACK!!! or some program delivered on

a dozen vinyl disks each week.   Eventually, I was allowed to play music on the air, and speak. Eventually, I mispronounced Sade. You try it.

When national radio talent and programming legend Brent Alberts took over, I was hired as his Programming Assistant and I got to keep doing the weekend and fill-in work on the air. Loved it.

Noteable radio legends I worked for: Mel Myers, Dave Michaels

Noteable comedy talent I worked for: Scot Parkin (legend, ask him)

Computer Connections
Sales Representative
August 1984 - August 1986 (2 years 1 month)
Tulsa, Oklahoma, United States

I was a retail salesperson paid 100% on commission. We sold IBM PC, XT, AT, and Jr; also Apple IIe, IIc, Lisa, and Macintosh.

I worked for Jerry Draper. I was required to learn the 24 how to sell video cassettes and I learned WIIFM and to stop talking at the Will Buy line. We never did use the Puppy Dog close, but that sure is a sharp monitor, isn't it, sir?   What can I do to get you into their Macintosh today? AppleCare or AppleCare+ with that?

AppleCare+ didn't exist, I did get paid a $50 spiff for selling a Macintosh, and another $50 if they paid for AppleCare... I think.. or a printer... Something. I remember seling a service contract was a valuable thing for me and useful to protect the customer's investment.

The spiffs were paid in cash by the Apple Lady by hand on Friday afternoons. They smelled like Apple Lady. They 1099'd us, I'm sure.
